SKILLS

AS400 IBM I Series

RPGLE, CLLE & ILE

Python & Full stack development

Tableau

SQL - Oracle

Streamlit

JD Edwards

EDUCATION

2023 - 2026 pursuing - CGPA -[9.33]

M.Tech AI & DS

SRM University , Kattankulathur

2019 - 2023

CGPA -7.77

B.E. Mechanical Engineering

Loyola Institute of Technology,

Chennai - 123 (Affiliated to Anna University)

2017 - 2019

12TH STD

SVVM, Thiruporur, Chengalpattu - 603110

2007 - 2017

10TH STD

St'Bedes A.I.Hr.Sec.School, Chennai - 600004

LANGUAGES

Tamil - Read Write Speak

English - Read Write Speak

German - Read Speak

PERSONAL PROFILE

Date of Birth : 16.10.2001

Gender : Male

Nationality : Indian

Marital status : Unmarried

Blood group : O+ve

PROFILE

- As a recent graduate with a strong passion for AS400 programming, I am eager to kickstart my career as a AS400 Developer.
- I possess a solid foundation in Python, including proficiency in key libraries and frameworks.
- My academic background, along with hands-on projects, has equipped me with problem-solving skills and a keen eye for detail.
- I am enthusiastic about contributing to innovative AS400 & Python-based projects and am committed to continuous learning and growth in the field.
- I'm excited to bring my fresh perspective and determination to your development team

WORK EXPERIENCE

INTERNSHIP

Inodesys Technologies Apr 2023 - Present

JD Edwards, RPG.

ACADEMIC PROJECTS

AUTOMATIC FIRE DETECTION & EXTINGUISHER SYSTEM (IOT).

Key Result Areas:

- Developed a Machine Learning model for real-time fire and smoke detection
- Achieved high accuracy in fire detection to minimize false alarms
- Designed and implemented an alarm system to promptly alert occupants and authorities
- Created a mechanism to automatically activate fire extinguishers upon fire detection
- Developed a web/mobile app for remote monitoring and timely alerts
- Logged and analyzed fire incident data for insights and improvements
- Ensured the system's stability, performed regular maintenance, and validated its functionality

INVENTORY MANAGEMENT SYSTEM DEVELOPED FOR THE AS400 PLATFORM.

Key Result Areas:

- This project is an Inventory Management System developed for the AS400 platform. The system is designed to efficiently manage inventory-related operations, providing separate dashboards for customers and vendors. The source code has been crafted using Full Free Format RPG to ensure modern and flexible programming practices.
